About me

I'm a Full Stack Developer with experience in web application development. I have worked on projects using technologies such as JavaScript, React Js, Redux, Node JS, Express, Sequelize, PostgreSQL, HTML, CSS. I have knowledge in agile methodologies, Jira, GIT, data structures, algorithms, and Chakra UI. I am passionate about studying and staying in continuous learning. I like challenges and good practices.

I consider myself a person with great adaptability, curiosity, and determination. I really enjoy working in a team to achieve goals efficiently, establishing relationships based on respect and collaboration.

Experience

February 10th, 2023 - March 9th, 2023 - Buenos Aires, Argentina

Academic Experience, Henry Bootcamp, VerdeVolver Project - Full Stack Developer

Design and develop an ecology-focused App that includes visualization of nearby recycling points based on the user's location, contact form, creation form to publish new recycling points on the map, local and third-party authentication, combined searches and filters, sorting, user banning, automatic email sending, donation payment gateway, interactive Google Maps, chatbox for resolving doubts, admin dashboard, among other features.

The front-end is developed with React Js, Redux, and styled with Chakra UI. The back-end is developed with Node.js with Express. The database is built with PostgreSQL and Sequelize. Integration will be carried out with Nodemailer, MercadoPago, Google Maps, Passport, Cloudinary, and other tools.
